

ARMOR COMPLETE SHARED RESPONSIBILITY

PURPOSE-BUILT TO PROTECT WORKLOADS & DATA IN THE CLOUD

Armor Complete, our secure cloud hosting platform, is a market-proven infrastructure-as-a-service (IaaS) solution that has been meeting business needs for security and agility for nearly a decade. By delivering real-time, on-demand cloud services that are secure from day 1, Armor Complete removes the burden of security from your team and empowers your business to move fast without compromising security.

**SECURITY AND COMPLIANCE IS A SHARED RESPONSIBILITY
BETWEEN ARMOR AND OUR CLIENTS.**

**ARMOR REDUCES THE BURDEN OF THESE CHALLENGES FOR YOUR
ORGANIZATION BY SHARING BOTH RISK AND RESPONSIBILITY.**

SECURITY "IN" THE CLOUD

It's the customer's responsibility to ensure that they meet their security, governance, and compliance requirements in the cloud. Armor helps you achieve this by providing a managed highly secure, high performance platform to run your critical data and applications. In addition, Armor provides threat remediation and incident response (IR) services.

SECURITY "OF" THE CLOUD

It is Armor's responsibility to maintain a high performance infrastructure free from vulnerabilities. In addition, Armor manages the physical security of the cloud service and ensures that unauthorized access to the hardware or software is prevented.

ARMOR COMPLETE

Purpose-built to achieve a secure and compliant posture for your workloads and data, Armor Complete makes it easy to balance security, cost-effectiveness, and cloud agility while addressing compliance with major mandates—PCI DSS, HIPAA, HITRUST, and GDPR.

FOR

HITRUST

ACHIEVE UNCOMPROMISED SECURITY, TOGETHER

Shared responsibility models take a layered approach to security. It is critical to the security of an organization's data that the organization understands its role in the shared responsibility model. Uncompromised security in the cloud is only possible when a customer fulfills their responsibilities and when you have a team of proven, talented experts leveraging best-of-breed security technology and scalable processes. This combination of talent, technology, and techniques is the core of Spartan, our proprietary threat prevention and response platform, which powers the end-to-end protection Armor Complete delivers to our clients' cloud workloads and hybrid IT.

THREAT INTELLIGENCE & SECURITY OPERATIONS POWERED BY SPARTAN
