AGENDA

CLOUD CHANGES EVERYTHING

THE CLOUD HAS CHANGED EVERYTHING

Compliance Management	Continuous Compliance

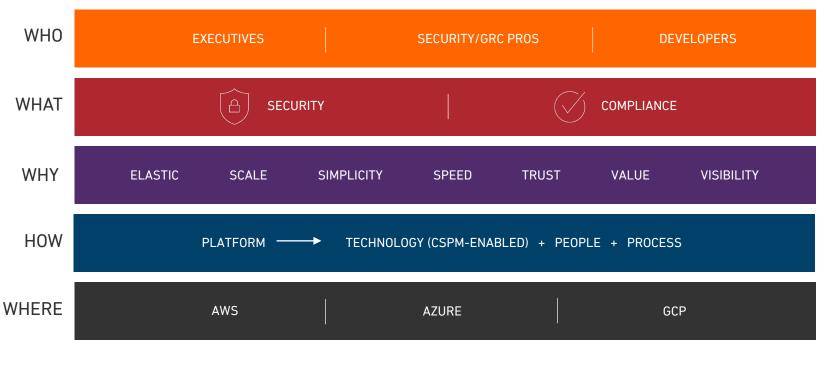

WHAT IS CONTINUOUS COMPLIANCE?

CONTINUOUS COMPLIANCE HAS BEEN A SET OF MANAGING PRINCIPLES FOR ONGOING COMPLIANCE ADHERENCE AND PERIODIC ATTESTATION.

CONTINUOUS COMPLIANCE IN THE ERA OF THE CLOUD

ARMOR

PROBLEMS THAT KEEP A CISO AWAKE AT NIGHT

Lack a holistic strategy to minimize the impact of a breach

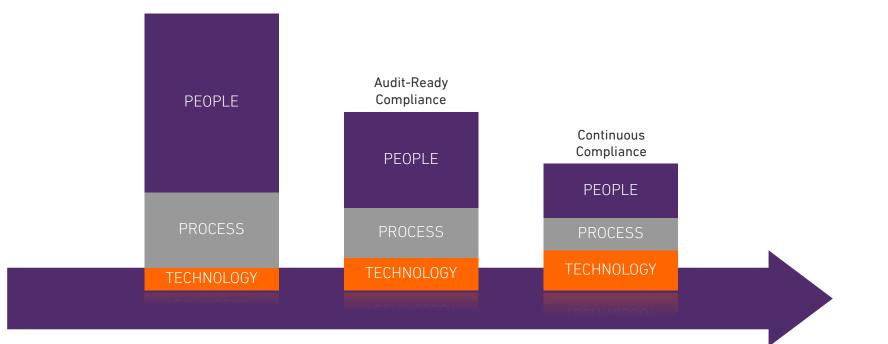

ARMOR

Require a cloud security readiness plan Expanded attack surface driven by digital transformation initiatives

Risk management and cost reduction/avoidance

CONTINUOUS COMPLIANCE = COMPLIANCE AT SCALE

CONTINUOUS COMPLIANCE = COMPLIANCE AT SCALE

		MANUAL-INTENSIVE COMPLIANCE	AUDIT-READY COMPLIANCE	CONTINUOUS COMPLIANCE
	Compliance Activities	Quarterly/Annually	Periodic	Continuously
\longleftrightarrow	Compliance Behavior	"Certified"	"Actual" - Managed	"Actual – Advanced"- Continuous
$\downarrow\uparrow$	Security Compatibility	Compliance does not mean Secure	Cloud Security Parity	Enhanced Security Parity
	Automated Discovery	_	_	•
	Automated Scanning	_	_	•
	Automated Remediation	_	_	•

ARMOR

ARMOR SECURITY SERVICE	PCC DSS COMPLIAN	HIPAA compliance	HITRUST	* * * * GDPR * * * *	RISK MITIGATION
NETWORK LAYER					
Intrusion Detection	•	•	•	•	Malicious allowed traffic
IP Reputation Filtering	•	•	•	•	Activity from known bad sources
Vulnerability Scanning	•	•	•	•	Exploits due to missing patches/updates; improper network firewall configuration
SERVER LAYER					
File Integrity Monitoring	•	•	•	•	Monitoring unauthorized changes to critical files
OS Patching/Updating/Monitoring	•	•	•	•	OS weaknesses Malware Protection
Malware Protection	•	•	•	•	Operating system weaknesses malware protection
Log Management	•	•	•	•	Detection of malicious activity
ADMINISTRATIVE CONTROLS					
Incident Response	•	٠	•	•	Response to security incidents
Security Audits	•	N/A	•	•	Validation of controls program
Business Associate Contract	N/A	٠	•	N/A	Legal liability for data loss/breach

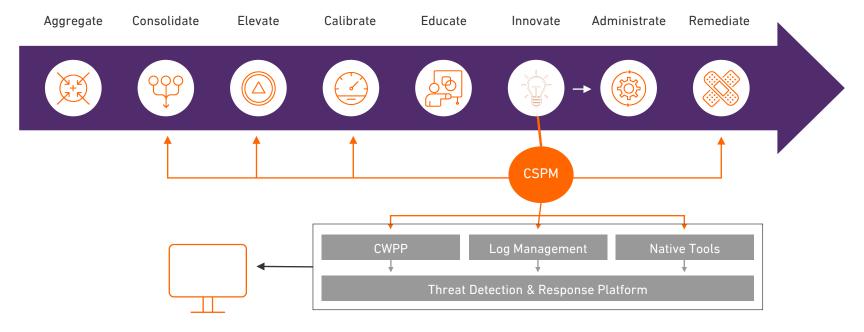

CLOUD SECURITY POSTURE MANAGEMENT (CSPM) AT WORK

ENACTING CONTINUOUS COMPLIANCE

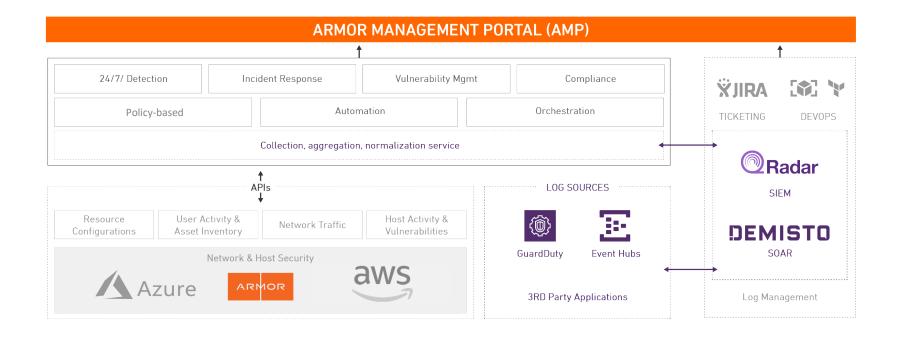

Continuous, uninterrupted workflow

ARMOR

END-TO-END: MISSION CRITICAL SECURITY

SECURITY AND COMPLIANCE POSTURE

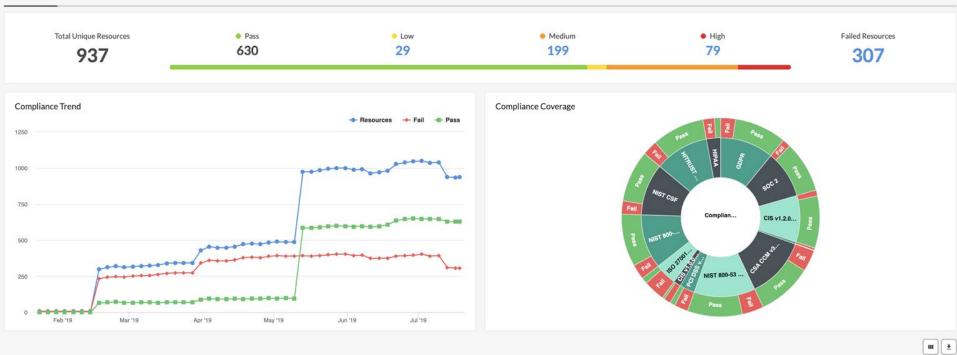

Easily quantify and assess your cloud security and compliance posture

Armor's Cloud Security Assessment boosts the security of your public clouds and improves your compliance posture by monitoring against industry standards, regulatory mandates and best practices to prevent issues like misconfigurations, unwarranted access, and nonstandard deployments.

ompliance Standards					
Resor 97		Pass 7 25 24%		Fail 72 43%	
COMPLIANCE STANDARD 🌩	description 🗘		RESOURCE(S) PASSED 🌩	RESOURCE(S) FAILED 🖨	POLICIES

KEY CUSTOMER PAIN POINTS IN PUBLIC CLOUD

ARMOR

Decentralized Administration & Lack of Visibility	Complexity of Compliance Management in the Cloud	Inability to Rapidly Detect & Respond to Threats
 No CMDB, real-time asset inventory or network topology diagrams exist for public cloud Large number of privileged users with little governance 	 Hundreds of unique cloud services, with more added daily Proving compliance to auditors challenging in dynamic environments 	 Traditional SIEMs do not have cloud context, and are unable to adapt to large data volumes and speed of change in public cloud
Impact	Impact	Impact
 Increased likelihood of undetected misconfigurations Inability to quantify risk to management and board 	 Stalled or delayed digital transformation initiatives Increased costs in achieving compliance 	 Alert fatigue due to constant changes Extensive delays in investigating alerts with no context

CLOUD IS REDEFINING HOW APPLICATIONS ARE BUILT

BUSINESS VALUE

Reduce Operational Burden Simplify Compliance and Governance

With one end-to-end suite, Ops teams don't need to waste time managing and integrating disparate tools Auto-prioritize issues to save precious time and immediately discover weaknesses in your environments

Increased Ops Productivity Prevent breaches and data leaks

Safely Adopt New Cloud Technology

With governance and workload protection that scale with your growth, you're free to leverage the full potential of cloud

Increase agility and innovation

TO SECURE THE CLOUD, YOU NEED TO PROTECT EVERY <u>RESOURCE</u>, ACROSS <u>THE ENTIRE LIFECYCLE</u>, CONSISTENTLY ACROSS <u>ANY CLOUD</u>.

Protect Every Resource

Prisma Cloud secures any deployed resource, across laaS, PaaS, Containers, Serverless and advanced Cloud Services

Protect The Lifecycle

Prisma Cloud seamlessly integrates with your CI/CD pipelines and secures applications from development to production

Protect Any Cloud

Prisma Cloud protects both public and private clouds, including AWS, Azure, GCP, and Alibaba Cloud

THE PROBLEM: COMPLIANCE ISN'T STATIC

New resources are constantly being deployed, IP addresses change and data is everywhere Audits take months of time due to the manual research across multiple feeds and logs Organizations hesitate to adopt new technologies in fear of violations

CLOUD COMPLIANCE IS DIFFICULT

Competing solutions lack automation, requiring endless manual effort to perform repeated tasks Combination of OSS and point solutions fail to provide enterprises with a complete view into multi-cloud environments Legacy solutions lack support for the modern, cloud native tech stack leaving users blind

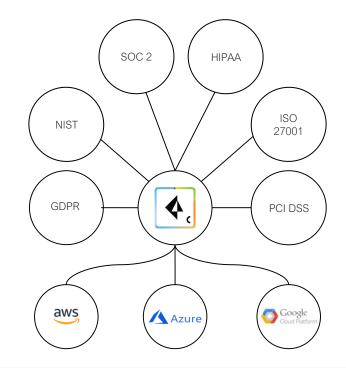

PRISMA PUBLIC CLOUD APPROACH: CLOUD COMPLIANCE, SIMPLIFIED

Ensure compliance continuously across environments with the industries most complete library of supported frameworks

Generate custom, audit-ready reports for your compliance standard with just a single click

Easily investigate and auto-remediate compliance violations

Enforce and report on all compliance standards, across platforms, workloads, and cloud services
