DEVSECOPS

INDUSTRY TALENT AND SKILL SHORTAGES

BUDGETING FOR SECURITY

SECURITY TOOL PROLIFERATION

THE CLOUD'S IMPACT ON SECURITY

EVOLVING ARCHITECTURES – CONTAINERS, SERVERLESS, & EVERYTHING IN BETWEEN

THE EVER-EXPANDING NETWORK PERIMETER – SAAS APPS, DATA ACCESS, BYOD, AND MOBILE DEVICES

RANSOMWARE

DATA SOVEREIGNTY, GDPR, AND US STATE DATA PRIVACY LAWS

ARMOR'S TIPS AND TRICKS

1

Strive to make security a part of your organizational culture and implement DevSecOps within your Product development cycle.

2

Leverage the expertise of your security vendors to help you combat tool proliferation, talent shortages, etc.

3

Recognize the ways in which the cloud changes security but also helps you achieve better security.

ARMOR'S TIPS AND TRICKS

4

Invest in your people – they are the next vector of attack, whether it's ransomware, mobile attacks, or phishing.

5

Pay attention to new compliance regulations and their impact to your business.

6

Learn, Learn, Learn – You're already doing that by being here at Armor's SecureCon event. Thank you!

Q & A

JOSH BOSQUEZ

Chief Technology Officer (CTO)

THANK YOU.
