

CLOUD <MIS>CONFIGURATIONS GOT YOU DOWN?

HERE'S HOW ARMOR ANYWHERE WITH CLOUD SECURITY POSTURE MANAGEMENT CAN HELP

COMPLIANCE MANAGEMENT	SECURITY MANAGEMENT
Manage IT, cybersecurity hygiene, and continuous compliance programs effectively.	Manage intentional and accidental risk effectively with a unified solution and user interface.

HOW IT WORKS:

DISCOVER

Generate on-demand reports to gain visibility into your cloud assets, understand your security posture, and map cloud assets to compliance controls.

DETECT

Identify cloud misconfigurations against major security and compliance frameworks such as PCI DSS, HIPPA, SOC2, NIST, GDPR, FEDRAMP, CIS, and many more.

REMEDiate

Follow step-by-step instructions to remediate those misconfigurations, like unsecured data storage, disabled MFA, and overly liberal account permissions, to name a few.
