

# THE STATE OF CYBERSECURITY FOR LAW, ACCOUNTING & FINANCIAL SERVICES

## THE GROWTH OF CYBERCRIME-AS-A-SERVICE

**1 BILLION**  
ACTIVE WEBSITES

The number of connections to the internet of things (IoT) has created a growing digital attack surface to launch debilitating cyber assaults on professional service industries, including law, accounting, and financial services.

**22 BILLION**  
DEVICES

SO MUCH SO, THAT CYBERCRIME-AS-A-SERVICE HAS TURNED INTO A BURGEONING INDUSTRY AND A PREVALENT CAUSE FOR AN INCREASE OF CYBERATTACKS.

**Cybersecurity Ventures estimates that cybercrime costs will reach \$10.5 trillion annually by 2025.**

**Malicious hackers are now attacking computers and networks at a rate of 1 attack every 39 seconds.**

**The most popular services and products are malware, ransomware, phishing kits, and command and control infrastructure.**

**Almost 200 million ransomware attacks occurred in the first 9 months of 2020.**

Get a more in-depth look at cybercrime’s impact on the law, accounting, and financial services industries – and strategies to reduce it - in Armor’s “The State of Cybersecurity for Law, Accounting, and Financial Services” whitepaper.
