

ARMOR PROTECTS YOUR HEALTHCARE DATA IN THE CLOUD

Securing healthcare networks is becoming more difficult. The number of applications and devices that connect to healthcare IT systems increases daily. Artificial intelligence (AI), the internet of health things (IoHT), and real-time health system (RTHS) solutions open new avenues for threat actors. This leaves healthcare IT departments to close the gap, while also managing a list of responsibilities:

- Protecting client data
- Ensuring IT infrastructure is stabilized
- Guiding internal data security policies
- Educating personnel on how to prevent breaches

In addition, they must remain compliant with the regulations mandated by the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

SIMPLIFY CLOUD SECURITY AND COMPLIANCE

Armor helps makes security and compliance simple, achievable, and manageable across any environment. We help safeguard endpoints, network, server, and cloud environments against malicious threats, while providing unparalleled insight into security risks. Respond to cyberthreats in real-time at a fraction of the cost of traditional solutions.

Our security controls are mapped to compliance mandates, such as PCI DSS, HIPAA/HITRUST, and GDPR, providing security and compliance benefits to reduce regulatory scope, simplifying the auditing process and lowering management costs. Securing your company and getting complete visibility across your IT environment shouldn't be so hard. Armor provides protection and audit-ready compliance in minutes, unifying visibility into and control over your entire IT environment.

For more than a decade, we have provided 24/7/365 security and on-demand support to our clients.

Armor Anywhere

Protect your data with threat detection and response while streamlining compliance. Safeguard endpoints, networks, servers, and any cloud environments against malicious threats.

Armor's Private Cloud

Turnkey, high-performance hosting infrastructure that is secured by Armor Anywhere while simplifying compliance.

TAKE YOUR COMPLIANCE PROGRAM TO THE NEXT LEVEL

Armor clients inherit HITRUST CSF controls by securing their data and applications with our HITRUST CSF Certified solutions. We make HIPAA compliance simple:

- **Inherited compliance controls:** Our solutions were built to address the risk-based nature of HIPAA compliance and pass their compliant status to customer data.
- **HIPAA compliance support:** Armor has a Governance, Risk, and Compliance team that continuously reviews and ensures that our solutions align to controls for major compliance frameworks.
- **Security-driven compliance:** We built our systems to maximize security. Compliance is an outcome, not a goal.

TRUSTED BY HITRUST

Many healthcare organizations require business partners to be HITRUST CSF Certified. The HITRUST CSF standardizes security guidelines for ePHI data, keeping it compliant and safe. Not only are we HITRUST CSF Certified—HITRUST is our client. Choose the security provider that HITRUST trusts to protect its data.

The company [Armor] has built its infrastructure specifically for security. It's extremely well-suited for our client data. It's HIPAA-compliant and has helped us streamline the scope of our own internal audits.

— HITRUST

Focus on patient outcomes and innovation, while Armor focuses on:

- Protecting EMR, ePHI, and other sensitive data where it's stored
- Simplifying compliance for HIPAA/HITRUST

Security priorities in healthcare:

- Create internal policies to help staff understand the importance of security and the role each employee plays
- Keep up with security updates and patches to remain current with evolving cyberthreats
- Scan your attack surface and identify vulnerabilities
- Prioritize security efforts; implement effective countermeasures to mitigate the risks

ARMOR.COM

Armor is a global cloud security company. We make cybersecurity and compliance simple, achievable, and manageable across your endpoint, network, server, and cloud environments. We provide unparalleled insight into threats and help you respond quickly and effectively.
